1. Description of bug 1

Add parent / BTBPS-1

1

[Route Generation] - Overflowing bin is omitted from the route

Key details

Description

Steps to Reproduce:

1. Log into the system as the Sanitation Supervisor.

2. Ensure smart trash bin fill-level data indicates at least one bin has exceeded the 80% fill threshold.

3. Select the option to generate a collection route.

4. Review the generated route.

Expected Result:

The generated route includes all bins above the 80% fill level unless manually excluded.

Actual Result:

An overflowing bin is omitted from the route.

2. Bug 2

Add parent / BTBPS-2

1

[Driver App] - System does not update the collection status

Key details

Description

Steps to Reproduce:

1. Log into the system as the Truck Driver.

2. View the assigned daily collection route.

3. Complete the pickup for a specific bin.

4. Attempt to mark the bin as collected in the system.

Expected Result:

The collection status of the selected bin changes to "collected".

Actual Result:

The system does not update the collection status.

3. Bug 3

Add parent / BTBPS-3

[Performance] - Route recalculation exceeds 45 seconds

Key details

Description

Steps to Reproduce:

1. Access the system as an authorized user.

2. Trigger a route recalculation for a simulated fleet of 50 trucks across 10,000 bins.

3. Monitor the execution time.

Expected Result:

Route generation completes in under 45 seconds.

Actual Result:

Route generation exceeds 45 seconds during performance testing.
