Generate optimized collection routes

Backlog ▾

⚡

⚡ Improve Story

⋮

+

▽ Description

As a Sanitation Supervisor,

I want the system to generate optimized daily collection routes for bins that have exceeded the 80% fill threshold,

So that overflowing bins can be prioritized and collected efficiently.

Manually modify collection routes

Backlog ▾

⚡ Improve Story

✓ Description

As a Sanitation Supervisor,

I want to manually add or remove bins from a generated collection route,

So that I can handle special situations and adjust routes when necessary.

View assigned collection route

Backlog ▾

✦ Improve Story

▽ Description

As a Truck Driver,

I want to view my assigned daily collection route and list of bins,

So that I know which locations need to be visited for waste collection.

Mark bin as collected

Backlog ▾

⚡ Improve Story

✓ Description

As a Truck Driver,

I want to mark a bin as collected after completing the pickup,

So that the system accurately tracks completed waste collection.

1

Ensure fast route recalculation performance

Backlog

Improve Story

Description

As a Sanitation Supervisor,

I want route recalculation for 50 trucks and 10,000 bins to complete within 45 seconds,

So that daily waste collection routes can be generated efficiently.

4. Kanban board showing work items across Backlog, In Progress and Done stages.

The screenshot displays a Jira Kanban board titled "KBP board" with a dark theme. The board is organized into four columns: "BACKLOG 14", "SELECTED FOR DEVELOPMENT 1", "IN PROGRESS 2", and "DONE 4".

BACKLOG 14:

- KBP-4 Generate optimized collection routes**
 - Retrieve smart bin fill-level data (KBP-11)
 - Filter bins above 80% fill threshold (KBP-12)
- Manually modify collection routes** (Smart Waste Collection Route Management)
 - Remove bin from generated route (KBP-14)
- View assigned collection route** (Waste Collection Execution and Tracking)
 - Display assigned route to driver (KBP-15)
 - Display list of assigned bins (KBP-16)

SELECTED FOR DEVELOPMENT 1:

- Generate optimized collection routes** (Smart Waste Collection Route Management)
 - KBP-4

IN PROGRESS 2:

- KBP-5 Manually modify collection routes**
 - Implement route modification functionality (KBP-13)
 - Manage missed-pickup complaints (Complaint Management and System Quality) (KBP-8)

DONE 4:

- Ensure fast route recalculation performance** (Complaint Management and System Quality)
 - Test route calculation with 50 trucks (KBP-21)
 - Verify route generation under 45 seconds (KBP-22)
- KBP-10 Implement role-based system access**
 - Configure Sanitation Supervisor permissions (KBP-23)

At the bottom of the "DONE" column, there is a "+ Create" button and a link "See older work items".
